

**Geology Intern – 2024 Field Season
Competition # 24-004DUS**

ABOUT US

Dahrouge Geological Consulting USA Ltd. (“Dahrouge”) is a North American mining and mineral exploration consulting company based in Denver, Colorado providing professional expertise in geological, exploration, project management and mining operations services through all stages of the mining value chain over a wide variety of commodities and materials.

With unwavering commitment to our team and the people we work with, our company is proud to offer competitive wages, excellent career development opportunities, and the possibility to join our growing team as we continue to serve our clients throughout the United States.

POSITION SUMMARY

Our team is currently seeking and accepting applications for multiple Geology Interns for the upcoming 2024 field season. Geology Interns will be working alongside Senior Geologists and Project Geologists to assist on projects or project work as needed. Applicants should be willing to travel and spend approximately 70% of their time in the field with the possibility of a valid Canadian or US Passport being required for some projects. Ideal candidates will have the following qualifications:

- Enrollment in a geoscience program at an accredited university;
- Entering or completed the 3rd year in a geoscience program;
- Valid driver’s license with clean abstract / record;
- Strong organization skills with attention to detail;
- Ability to carry loads of 50-lbs for extended periods of time;
- First Aid Certification with Level C CPR and AED is considered an asset;
- Strong English oral and written communication; fluency in a second language may be considered an asset;
- Prior field experience and / or familiarity working in remote locations with helicopters or fixed-wing airplanes is considered an asset;
- Experience with industry standard software packages such as ArcGIS, QGIS, Leapfrog, Vulcan, Microsoft Office, etc. is considered an asset;

ESSENTIAL RESPONSIBILITIES

The positions will consist primarily of field work under the supervision of the Senior Geologist or Project Geologist on site with the additional possibility of home- or office-based work. Key responsibilities may include:

- Assistance with general project planning and preparation;
- Assistance with soil and rock sample survey planning and execution;
- Assistance or completion of ground-based geophysical surveys;
- Drill core logging and material sampling with adherence to best-practice QA/QC protocols;
- Recognition and compliance with regulatory and Health, Safety, and Environmental guidelines;
- Assistance or completion of data entry, compilation, analysis, and interpretation;

Colorado’s Equal Pay for Equal Work Act: Requires employers to provide the following information for positions that may be in Colorado. The compensation range offered for this position is \$28 to \$33 per hour. The final agreed upon compensation will be based on job-related education, training, and/or experience. Please note, the compensation offer will not be based on a candidate’s salary history at other jobs.

The positions will serve as an excellent opportunity to learn and grow within the mining and mineral exploration sector. Interested candidates should submit an updated resume, cover letter, and year of study to careers@dahrouge.com with “Geology Intern” cited in the subject line of the application.
