

Exploration Geologist I / II

ABOUT US

Dahrouge Geological Consulting USA Ltd. is a North American mining and mineral exploration consulting company based in Denver, Colorado providing professional expertise in geological, exploration, project management and mining operations services through all stages of the mining value chain over a wide variety of commodities and materials.

With unwavering commitment to our team and the people we work with, our company is proud to offer competitive wages, excellent career development opportunities, and the possibility to join our growing team as we continue to serve our clients throughout the United States.

POSITION SUMMARY & QUALIFICATIONS

Our team is currently seeking an Exploration Geologist I or II based in Denver, CO to provide technical expertise and leadership on various projects located within North America as assigned.

Reporting to the Operations Manager, the Exploration Geologist will be assigned to various exploration and/or mine site activities. Activities are inclusive but not limited to drill core/chip logging, geologic mapping, cross-section creation and interpretation, , sample QA/QC and drilling program management, database entry and review, field sampling, geophysical ground surveys, regular reporting and communication with the DGC USA team, and maintaining relationships with clients. Other tasks may include program scheduling, budgeting, and reporting.

The ideal candidate will have proficient academic and industry experience in ore deposit systems, mineral exploration and/or hard-rock mining. Professional experience and knowledge of various mineralization systems is advantageous. The candidate should be able to identify and describe various rocks and minerals, alteration textures, and mineralization properties, possess exceptional geologic observation skills, and be a motivated and self-reliant individual with a strong work ethic. Ideal candidates will hold the following qualifications:

- Based in or near Denver, CO;
- B.Sc. or M.Sc. in Geology / Earth Sciences from an accredited University;
- Minimum 2-6 years of relevant mining/ exploration experience;
- Excellent verbal and written communication skills;
- Exceptional proficiency in Microsoft Office software;
- Familiarity with ArcGIS, Leapfrog Geo, Vulcan and/or other Geological modelling packages considered a strong asset;
- Basic understanding and knowledge of best-practice ethics and industry work standards;
- Experience working on and / or managing all aspects of surface drilling programs considered an asset;
- Ability to lift and carry up to 50lbs as needed and work in various weather conditions and climates;
- Ability to travel on a rotational basis in support of client needs and various regional projects;

REQUIREMENTS / CERTIFICATIONS

- Mine Safety and Health Administration (MSHA) certification is considered an asset, but not required;
- Professional Geologist licensure or the ability to register within 1 year of employment is considered a strong asset;
- A valid Driver's License;
- Required to adhere to company and client Health, Safety, and Environmental protocols;
- Ability to travel and work variable rotating schedules as per client and/or project needs;
- Ability to work in a fast-paced and dynamic environment;
- Ability to work and communicate effectively in a collaborative team setting with a positive and proactive attitude.

Colorado's Equal Pay for Equal Work Act: Requires employers to provide the following information for positions that may be in Colorado. The salary range offered for this role is \$65,000 to \$90,000. The final agreed upon salary will be based on job-related education, training, and/or experience. Please note, the salary offer will not be based on a candidate's salary history at other jobs.

Interested candidates should submit an updated resume, cover letter, and anticipated date of availability to Trevor Mills P.G., SME-RM at trevor@dahrouge.com and careers@dahrouge.com with "Exploration Geologist Application" within the email header.
