

PROJECT GEOLOGIST CONTRACT

ABOUT US

Dahrouge Geological Consulting Ltd. is a North American mining and mineral exploration consulting company based in Edmonton, Alberta providing professional expertise in geological, exploration, project management and mining operations services through all stages of the mining value chain over a wide variety of commodities and materials.

With unwavering commitment to our team and the people we work with, our company is proud to offer competitive wages, excellent career development opportunities, and the possibility to join our growing team as we continue to serve our clients throughout Canada.

POSITION SUMMARY & QUALIFICATIONS

Our team is currently seeking a Project Geologist based in Canada to lead, assist, and provide technical expertise and leadership on various projects located within Canada as assigned. The position is a 6-month contract with potential for permanent extension and the ideal candidate will be available to start as soon as possible.

Reporting to the Senior Geologist and/or client, the Project Geologist will carry out various exploration and/or mine site activities including but not limited to drill core/chip logging, geologic mapping, cross-section creation and interpretation, drilling and QA/QC program management, database entry and review, field sampling, geophysical ground surveys, and regular reporting to the company and client management. Other tasks may include program scheduling, budgeting, tracking, and reporting.

The ideal candidate will have proficient academic and industry experience in ore deposits systems, mineral exploration and/or hard-rock mining. The candidate should be able to proficiently identify and describe various rocks and minerals, alteration, and mineralization properties, possess exceptional geologic observation skills, and be a motivated and self-reliant individual with an exemplary attitude towards safety, ethics, and corporate responsibility. Ideal candidates will hold the following qualifications:

- Preferably based in a metropolitan Canadian hub;
- B.Sc. or M.Sc. in Geology / Earth Sciences from an accredited University;
- Minimum 5-8 years of relevant mining / mineral exploration experience;
- Lithium experience considered a strong asset;
- Exceptional verbal and written communication skills;
- Exceptional proficiency in Microsoft Office software;
- Familiarity with ArcGIS, Leapfrog Geo, MineSight 3D, Vulcan and/or GEMS considered a strong asset;
- Proficient experience and knowledge of best-practice ethics and industry work standards;
- Proficient experience working on and / or managing all aspects of surface drilling programs;
- Ability to lift and carry up to 60lbs as needed and possibly on a regular basis;
- Ability to work in extreme weather conditions; and
- Ability to travel frequently on a rotational basis in support of various regional projects.

REQUIREMENTS / RESPONSIBILITIES

- Ability to travel and work variable rotating schedules as per client and/or project needs;
- Ability to work in a fast-paced and dynamic environment;
- Ability to adhere to and promote company and client Health, Safety, and Environmental protocols;
- Professional Geologist (P.Ge.) accreditation or ability to become accredited considered a strong asset; and
- Ability to work in a collaborative team setting with a positive and proactive attitude.

Interested and qualified candidates should submit an updated resume, cover letter, and anticipated date of availability to careers@dahrouge.com with "Project Geologist Application" in the email subject line.
