

**SENIOR GEOLOGIST
VARIABLE CONTRACTS**

ABOUT US

Dahrouge Geological Consulting USA Ltd. is a North American mining and mineral exploration consulting company based in Denver, Colorado providing professional expertise in geological, exploration, project management and mining operations services through all stages of the mining value chain over a wide variety of commodities and materials.

With unwavering commitment to our team and the people we work with, our company is proud to offer competitive wages, excellent career development opportunities, and the possibility to join our growing team as we continue to serve our clients throughout the United States.

POSITION SUMMARY & QUALIFICATIONS

Our team is currently seeking a Senior Geologist based in the Tucson, AZ region to lead, assist, and provide technical expertise and leadership on various projects located within the general region as assigned.

Reporting to the Chief Operating Officer and Operations Manager, the Senior Geologist will carry out and provide comprehensive technical and managerial leadership to both field- and office-based exploration and mining operations teams. Tasks will include mentorship and training of junior geologists, business development and client relations, construction and tracking of program budgets and proposals, routine reporting to both internal and external management, and various field tasks such as drill core/chip logging, geologic mapping, cross-section creation and interpretation, drilling and QA/QC program management, database entry and review, and field sampling.

The ideal candidate will have proficient academic and exceptional industry experience in ore deposits systems and a proven track record of success within the mineral exploration and/or mining operations industry. Academic and professional experience in porphyry and epithermal systems is considered an exceptionally strong asset. The candidate should be able to identify and describe various rocks and minerals, alteration, and mineralization properties with utmost confidence, possess exceptional geologic observation skills, and be a motivated and self-reliant individual with an exemplary and unwavering attitude towards safety, ethics, and corporate responsibility. Ideal candidates will hold the following qualifications:

- Preferably based in or near the Tucson, AZ, USA region;
- B.Sc. or M.Sc in Geology / Earth Sciences from an accredited University;
- Minimum 10-12 years of relevant mining / exploration experience;
- Exceptional verbal and written communication skills;
- Exceptional proficiency in Microsoft Office software;
- Proficiency with ArcGIS, Leapfrog Geo, MineSight 3D, Vulcan and/or GEMS considered a strong asset;
- Proficient experience and knowledge of best-practice ethics and industry work standards;
- Proficient experience working on and / or managing all aspects of surface drilling programs;
- Proficient experience and leadership managing and tracking teams, programs, and budgets and deliverables;
- Ability to travel frequently on a rotational basis in support of various regional projects and clients;

REQUIREMENTS / CERTIFICATIONS

- Mine Safety and Health Administration (MSHA) certification and a valid Driver's License;
- Ability to travel and work variable rotating schedules as per client and/or project needs;
- Ability to work in a fast-paced and dynamic environment;
- Ability to adhere to and promote company and client Health, Safety, and Environmental protocols;
- Professional licensure or accreditation or ability to become licensed or accredited considered a strong asset;
- Ability to work in a collaborative team setting with a positive and proactive attitude.

Interested candidates should submit an updated resume, cover letter, and anticipated date of availability to christopherj@dahrouge.com and careers@dahrouge.com with "Senior Geologist Application" within the email header.
